

Contents

Part I – Education in Mathematics

1. R. J. Pawlak, E. Korczak-Kubiak – <i>Elements of Mathematical Epistemology – Elements of the Philosophy of Teaching Mathematics</i>	11
2. B. Bartošová – <i>Is Math a Gift?</i>	25
3. A. Bryll, R. Sochacki – <i>Some Remarks on Fluid Flow in Hourglasses</i> ,	29
4. R. Grebeň, J. Molnár – <i>Geometric Terminology and Imagination</i>	37
5. J. Hodaňová, T. Zdráhal – <i>Central Limit Theorem Visualized in Excel</i>	51
6. L. Janská – <i>ICT Influence on Pupils' Learning (Not Only in Mathematics Teaching)</i>	57
7. J. Jędrzejewski, T. Kostrzewski – <i>A Mistake in Definition of a Limit of Function and Some Consequences</i>	61
8. J. Jędrzejewski, I. Tyrła – <i>Why the Area of a Rectangle is Calculated by the Formula $P = a \cdot b$?</i>	67
9. J. Jędrzejewski, M. Ziółkowski – <i>Divisibility and its Application in Teaching Mathematics in the third educational level</i>	71
10. J. Jureczko – <i>Using Graphic Display Calculator in Solving Some Problems with Polynomials</i>	83
11. M. Korcz – <i>Workshops as a Significant Vocational Education Component of Students Specializing in Teaching Fields</i>	95
12. J. Kowalski – <i>Can Information Technology Change Attitude of the Student in the Teaching of Mathematics?</i>	101
13. J. Laitochová, J. Wossala – <i>Pupils' Motivation in Mathematics Teaching Using the CLIL Method</i>	111
14. J. Major, M. Major – <i>Non-standard Tasks in Mathematical Education</i>	115

15.	B. Novák, E. Nováková – <i>Inquiry Based Mathematics Education (IBME) and its Reflection by Primary School Teachers</i> _____	121
16.	A. Pyzara – <i>Many Faces of Mathematical Modelling</i> _____	129
17.	M. Šnoriková – <i>The Evaluation of Mathematical Textbooks According to Their Teaching Quality</i> _____	143
18.	L. Stępień, M. R. Stępień, M. Ziółkowski – <i>On Teaching of Geometric Transformations in School</i> _____	153
19.	J. Stróżyk – <i>Blended learning in Polish schools</i> _____	165

Part II – Mathematics and Its Applications

1.	K. Domańska – <i>On Some Characterization of an Inverse Proportionality Type Function</i> _____	175
2.	R. Frič, M. Papčo – <i>Fuzzified Probability: from Kolmogorov to Zadeh and Beyond</i> _____	179
3.	G. Krech – <i>Boundary Value Problems for Poisson Integrals for Hermite Expansions</i> _____	189
4.	K. Nowakowska, M. Turowska – <i>A Note on Weakly ϱ-upper Continuous Functions</i> _____	195
5.	Y. Povstenko – <i>Axisymmetric Thermal Stresses in a Half-space in the Framework of Fractional Thermoelasticity</i> _____	207
6.	M. Selyaninov – <i>Application of Modular Computing Technique for High Speed Implementation of Cyclic Convolution</i> _____	217
7.	K. Troczka-Pawelec – <i>K-continuity Problem of K-superquadratic Set-valued Functions</i> _____	227

8. **K. Troczka-Pawelec, I. Tyrala** – *K-continuity of K-subquadratic Set-valued Functions* _____ 237
9. **M. Turowska** – *About Differentiability and VBG_* Class* _____ 245
10. **A. Yatsko** – *An Estimation Method of Traffic Safety Level of Vehicles on a Level Crossing* _____ 251
11. **R. Telgársky** – *Eyes, Optics and Imaging: Mathematics and Engineering Innovations Inspired by Nature* _____ 259

Part III – Varia

1. **I. Jóźwik, M. Terepeta** – *Profesor Tadeusz Świątkowski – dobry duch Politechniki Łódzkiej* _____ 277
